

Antoine Lucas

Vice President, Markets

Southwest Power Pool

As Vice President of Markets, Lucas oversees development, design and provision of all SPP market-based services. He works with stakeholders to ensure continued provision of the efficient and reliable wholesale electricity markets currently administered under the SPP Open Access Transmission Tariff and to develop additional value-added services.

Lucas formerly was SPP's Vice President of Engineering. Prior to joining SPP, Lucas worked in real-time system operations for Entergy Services, Inc. in roles as an engineer and system operator. Lucas earned a master's degree in business administration from the University of Arkansas-Little Rock and a bachelor's degree in industrial engineering from Louisiana Tech University.
